

Application of Huynh 2020 Interim Analysis methods to assessed stocks from the US South Atlantic

Nikolai Klibansky

14 December, 2021

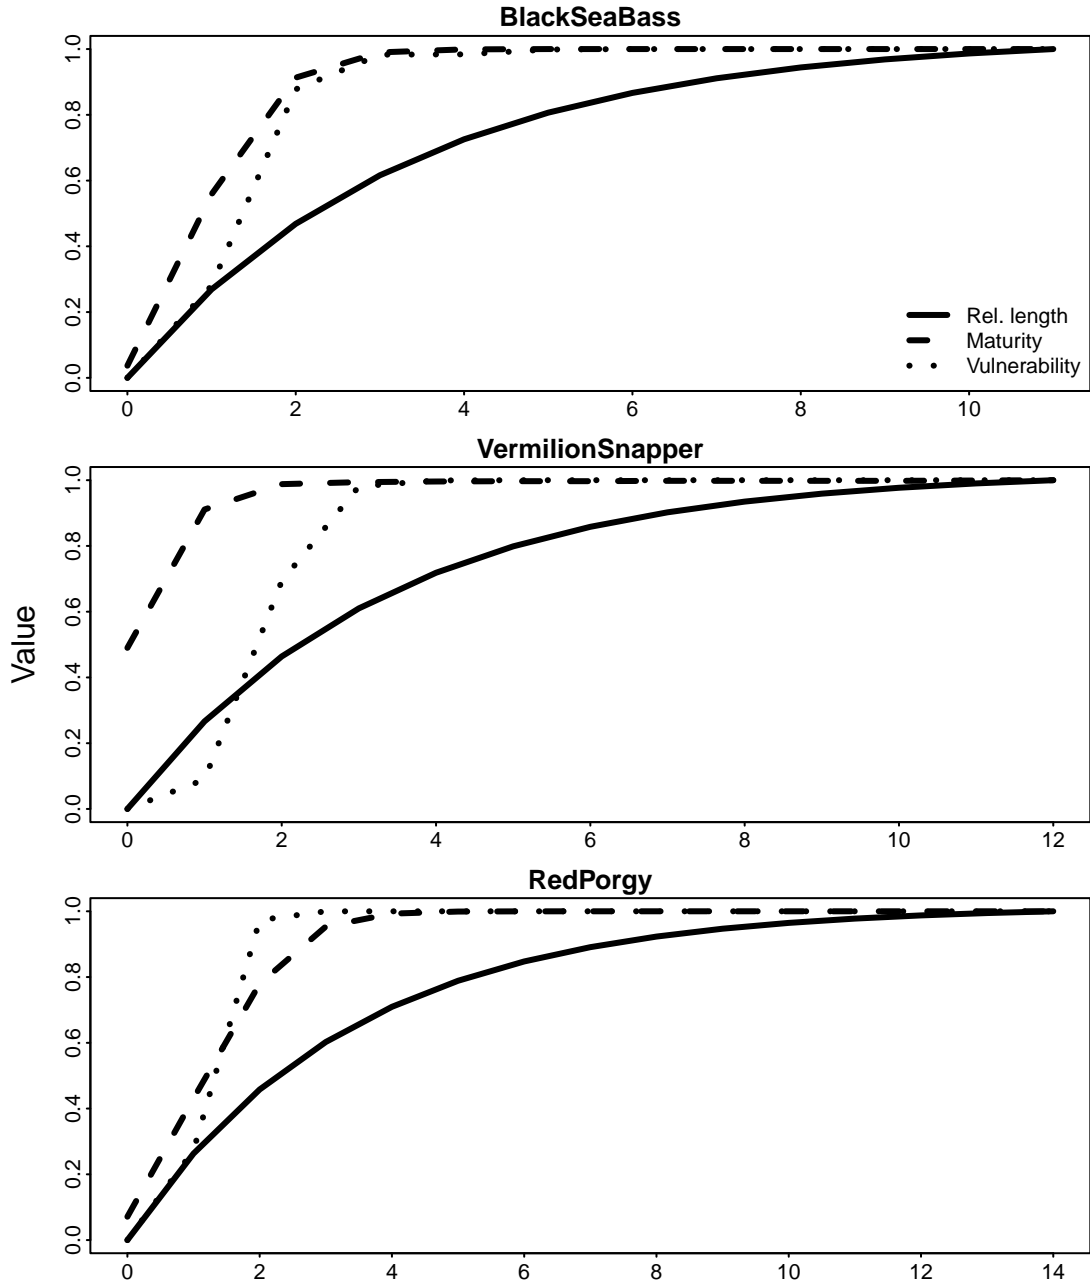

Figure 1: Life history (growth and maturity) and vulnerability schedules at age used in the operating models for BlackSeaBass, VermilionSnapper, and RedPorgy. Growth is expressed as mean length-at-age relative to that at the maximum age. Compare with Huynh et al (2020) Figure 1.
